**Subject:** RE: Draft Report for PEPA, PMPA Isomers

Hi Lam,

Sorry for the slow reply I have been slammed in the lab with other stuff and email takes a far back seat. I am glad to take a look at this and be on the call as time allows. The week of March 1-5 is pretty full for me. The week after that March 8-12 is better with the 8<sup>th</sup> and the 12<sup>th</sup> currently pretty open.

Mark

**Subject:** Draft Report for PEPA, PMPA Isomers

Mark,

We have finally put together a draft report for the PEPA/PMPA isomers studies based on results from your work and also from our testing labs and our own lab and I have attached the documents. I'd very much appreciate your feedback on this and in addition, we plan on having a call with NC-DEQ to present these findings sometime the next 2 weeks. By the way, NC-DEQ has also requested if you can also participate on the call. Perhaps we can discuss this late this week to discuss more and I also would very much like to catch up if you are available. Please let me know of your availability for the DEQ call the next 2 weeks and we'll go from there.

Best Regards,  
Lam
